This is a purely vegetable compound, prepared on strictly relentific principles, after the manner of the c lebrated Helland Profesor, Borrhave. Because of t great success in most of the European States, its introduction into the United States was intended more especially for the e of our fatherland scattered here and there over the face of this fatherland scattered here and there over the face of this mighty country. Meeting with great success among them, I now offer it to the Ameoican public, knowing the its truly wonderful necicinal virtues must be acknowle ged.

It is particularly recommended to those persons whose constitutions may have been in pired by he continuous use of ardent suit is, or other forms of dissipation. 4 It is not a Shuttle Machine. 5 It sews with two needles, usking any length stitch desired. 6 It sews from two ordinary spools, and thus all trouble at winding thread is avoided; while the same Machine can be adapted at pleasure, by a mere change of spools, to all varieties of work. 7 The same Machine runs silk or linen

thread, and common spool cotton, with equal facility. 8 Tois Machine will sew in the sleeves of coat with the same ease and facility that it sews a straight seam. 9 This Machine can be run to make one

thousand five hundred stitches per minute. 10 The seams are as elastic as the most elastie fabric, so that it is free from all liability to break in washing, ironing or otherwise. 11 The stiches made by this machine are more beautiful than any other made either by hand or machine. The price of these Machines at office in New
